

Welcome to the MusicFirst Classroom!

This online program is used to help support music teachers with resources, different software tools, a calendar, and a gradebook. Students may be completing assignments or simply viewing lessons in class, depending on what their music teacher has in mind. Here are a couple basics about getting started.

Logging In

Every MusicFirst Classroom has been setup with a custom website. This **must** be used to access the MusicFirst Classroom. If you're not sure of your website's URL, check with your teacher. Your teacher should have provided you with a username and password to use once you reach the login screen. If you're having any trouble with usernames or passwords, please contact your teacher.

Devices

Using an iPad or iPhone? Make sure the MusicFirst Student App is downloaded and students are using their username, password, and custom website URL to login.

After logging in, click the Software tab in the top left corner of the Classroom.

If you see this logo: Sight Reading Factory, you'll need to download the Sight Reading Factory App.

If you see this logo: Soundtrap, you'll need to download the Soundtrap App.

All these Apps are available for free from the App Store. Students will ONLY need to login to the MusicFirst Student App and access assignments from within the MusicFirst Classroom.

Using an Android phone or tablet? Make sure students are logging in using the Google Chrome browser.

Using a laptop, desktop, or Chromebook? Students need to be using Google Chrome for these devices.

User Guide and Tutorials

Students have access to a User Guide and Tutorials designed just for them. You can find all these resources underneath the "?" in the top right corner of the MusicFirst Classroom. All the Tutorials are videos and the User Guide includes written (text and image) instructions.
